EDUCATION

Vellore Institute of Technology, Bhopal

08/2023 – 2027

Bachelor of Technology in Computer Science (Core) | CGPA: 8.6/10.0

PROFESSIONAL EXPERIENCE

L&T Technology Services (LTTS)

05/2026 – 07/2026

SDE Intern

Vadodara, India

- Developed React.js frontend modules with component-based architecture, reducing UI rendering time by ~30% through optimized state management and lazy loading.
- Integrated .NET APIs with Microsoft SQL Server, writing optimized SQL queries that improved data retrieval performance by 25% for high-frequency dashboard endpoints.
- Spearheaded delivery of 3 production features and debugging across releases; executed QA test plans following enterprise Agile workflows.

TECHNICAL PROJECTS

SevaMitra | *Real-Time Volunteer Management System — Mahakumbh 2025*

[GitHub](#)

- Architected a full-stack platform managing 10,000+ volunteers across 20+ zones; Redis caching cut dashboard load time by ~40% and Docker containerization reduced deployment setup by 60%.
- Built a Smart Allocation Engine scoring volunteers across 4 parameters (skills, proximity, availability, reliability), enabling sub-second task assignment across concurrent operator sessions.
- Implemented Socket.io real-time incident system with live capacity tracking for 20+ map zones, reducing manual coordination overhead by ~50%.
- Technologies:** Next.js 14, Node.js, Express, PostgreSQL, Prisma ORM, Redis, Socket.io, Docker, TypeScript

PacketPulse DPI System | *Distributed Network Monitoring & Threat Detection*

[GitHub](#)

- Engineered a distributed packet analysis system processing 10,000+ packets/sec using Kafka event streaming, a C++ capture engine, and Python analysis workers.
- Designed PostgreSQL + Redis pipelines achieving sub-50ms query latency across 5+ interfaces; Docker containerization cut deployment time by 60% vs. bare-metal.
- Technologies:** C++, Python, React, Kafka, FastAPI, PostgreSQL, Redis, Docker, Kubernetes

BlendSense | *Fuel Property Prediction Engine — Shell.ai Hackathon 2025*

[GitHub](#)

- Built a multi-target regression pipeline using LightGBM on 15+ physicochemical features, achieving a leaderboard MAPE score of 67.64 among ranked submissions.
- Applied Optuna hyperparameter tuning and 5-fold cross-validation, reducing model variance by 18% vs. baseline single-split evaluation.
- Technologies:** Python, LightGBM, Scikit-learn, Optuna, Pandas, NumPy

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, SQL

Frameworks & Libraries: React, Next.js, Node.js, Express.js, FastAPI, .NET, Socket.io, XGBoost, LightGBM, Scikit-learn

Databases: PostgreSQL, MySQL, Redis, Microsoft SQL Server, Kafka

Cloud & DevOps: AWS (SAA-C03), Docker, Kubernetes, CI/CD, Git, Linux, REST APIs, Microservices

LICENSES & CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03)

May 2026

Google IT Support Professional Certificate

January 2026

Oracle Certified AI Foundations Associate

October 2025

ACHIEVEMENTS & ACTIVITIES

Competitive Programming & DSA: Solved 600+ problems across LeetCode, CodeChef, and Codeforces; LeetCode Rating: 1359.

Hackathon — 23rd Place: *SevaMitra* placed 23rd at Expert Hire Mahakumbh Hackathon out of 400+ competing teams.

Open Source — GSSOC 2024 Contributor: Contributed feature enhancements and bug fixes across multiple repositories through collaborative development workflows.

Leadership: Led technical execution for CISCO Community events as core Technical Team Member and contributed to the club website.
