Education

Vellore Institute of Technology

08/2023 – 2027

Bachelor of Technology in Computer Science (Core) — CGPA: 8.6/10.0

Professional Experience

CovisionAI

07/2026 – Present

AI Product & Strategy Intern

Remote

- Built React.js UI modules using Claude Code for the prompt pipeline, cutting manual review time by ~40% across 200+ images daily.
- Conducted structured prompt evaluation across product image categories, identifying failure patterns and increasing output consistency by ~35% over baseline.
- Collaborated with a cross-functional team of 7 on market research, go-to-market strategy, and client-facing product demonstration.

L&T Technology Services (LTTTS)

05/2026 – 07/2026

Software Development Engineer Intern

Vadodara, India

- Developed React.js frontend modules, reducing UI rendering time by ~30% through component-based architecture, optimized state management, and lazy loading.
- Integrated .NET APIs with Microsoft SQL Server; wrote optimized SQL queries improving data retrieval performance by 25% for high-frequency dashboard endpoints.
- Delivered 3 production features across release cycles; executed structured QA test plans following enterprise Agile workflows.

Technical Projects

SevaMitra | Real-Time Volunteer Management Platform — Mahakumbh 2025

[GitHub](#)

- Architected a full-stack volunteer management platform handling 10,000+ volunteers across 20+ zones; Redis caching cut load time by ~40% and Docker reduced deployment setup by 60%.
- Built a Smart Allocation Engine scoring volunteers on 4 parameters (skills, proximity, availability, reliability), enabling sub-second automated task assignment at scale.
- Integrated an LLM-powered AI chatbot (SevaSahayak) via Groq inference API for real-time query resolution; implemented Socket.io live zone capacity tracking across 20+ zones.
- Technologies: Next.js, Node.js, Express.js, PostgreSQL, Prisma ORM, Redis, Socket.io, Docker, TypeScript, LLM

PacketPulse | Distributed Deep Packet Inspection, Network Monitoring & Threat Detection

[GitHub](#)

- Engineered a distributed deep packet inspection system processing 10,000+ packets/sec via Apache Kafka event streaming, C++ capture engine, and Python analysis workers.
- Designed PostgreSQL + Redis pipelines achieving sub-50ms query latency across 5+ interfaces; integrated Groq LLM inference API for anomaly summarization and a threat analysis chatbot.
- Technologies: C++, Python, React.js, Apache Kafka, FastAPI, PostgreSQL, Redis, Docker, Kubernetes, LLM

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, .NET, Socket.io

Databases: PostgreSQL, MySQL, Redis, Microsoft SQL Server, Apache Kafka

Cloud & DevOps: AWS (SAA-C03), Docker, Kubernetes, Git, Linux, RESTful APIs

AI & Tools: Prompt Engineering, Large Language Models, Groq API, Computer Vision, Cursor, Claude Code

Licenses & Certifications

AWS Certified Solutions Architect – Associate (SAA-C03)

May 2026

Google IT Support Professional Certificate

January 2026

Oracle Certified AI Foundations Associate

October 2025

Achievements & Activities

Competitive Programming: Solved 600+ DSA problems on LeetCode, CodeChef, and Codeforces; LeetCode Rating: 1359.

Hackathon — 23rd Place: SevaMitra ranked 23rd at Expert Hire Mahakumbh Hackathon among 400+ teams.

Open Source — GirlScript Summer of Code 2024: Contributed feature enhancements and bug fixes across open-source repositories via pull request workflows.

Leadership: Technical Team Member, CISCO Community; led technical events and contributed to web development of club website.
